(4) An approval under this section may specify conditions which must be complied with if the approval is to apply, for any purposes specified in the approval, to any telecommunication system or equipment which is so specified or is of a description so specified; and any such condition may impose on the person to whom the approval is given a requirement from time to time to satisfy some other person with respect to any matter.

(5) The Authority or any other person by whom any matter falls to be determined for the purposes of any requirement imposed in pursuance of subsection (2) or (4) may charge a fee in respect of the carrying out of any test or other assessment made by the Authority or other person.

(6) A public telecommunication licensee may, with the approval of the Authority (except in cases of emergency), cease or refuse to supply a telecommunication service to any person by means of a telecommunication system

or telecommunication line operated by the licensee if, through the use of such telecommunication service, there is or is intended to be connected to the telecommunication system or telecommunication line, equipment or cabling that is a threat to —

(2) A scheme made under this section may make different provision for different cases or classes of cases determined by, or in accordance with, the provisions of the scheme.

(4) A scheme or any amendment thereof made under this section shall come into operation on such date as may be determined by the Authority.

(5) Nothing in this section shall be construed as prohibiting the Authority from levying any charge or collecting any dues for anything done or any service rendered by reason only of not being incorporated in a scheme and the rates, charges and fees payable to the Authority for any service rendered shall be in accordance with such rates, charges and fees as may, from time to time, be determined by the Authority.

(6) The rates, charges and fees applied by the TAS immediately before the appointed day shall continue to be valid as though determined by the Authority under this section until rescinded, varied or otherwise determined by the Authority.

(2) In the event of any damage or disturbance being caused by reason of the entry, the public telecommunication licensee shall pay compensation to the owner or occupier thereof.

(3) Nothing in this section shall be deemed to authorise any employee or agent of a public telecommunication licensee to cut down or clear away any vegetation or any fence or other erection or to enter any building or upon any enclosure attached to any building.

Power to enter on State land for purposes of installation or plant

13. For the purpose of providing any telecommunication service, a public telecommunication licensee or any person authorised by the Authority in that behalf may, at any reasonable time, enter upon any State land and may, subject to the approval of the Authority and the Collector of Land Revenue, erect in or upon the State land such installation or plant used for telecommunications or excavate such trenches as may be necessary or proper for the purpose of providing the telecommunication service, and may carry out all necessary works in connection therewith, and may, in the course thereof, fell or lop trees, remove vegetation and do all other things necessary for that purpose, but —

(2) Any compensation payable under subsection (1) may include an annual payment for land or other immovable property used for the purpose of the public telecommunication licensee's installation or plant.

(3) A public telecommunication licensee shall not acquire any right other than that of user only in respect of any land or property under, over, along, across, in or upon which the licensee places any installation or plant used for telecommunications under this section.

(4) Before entering on any land for the purpose specified in subsection (1), a public telecommunication licensee shall give 14 days' notice stating as fully and accurately as possible the nature and extent of the acts intended to be done.

16. —(1) Whenever it is necessary to do so for the purposes of carrying out any functions and duties of the Authority under this Act or any regulations made thereunder, the Authority may enter upon any land or building, or stop or board any vessel, aircraft or vehicle and may carry out all necessary inspections or investigations and do all things necessary for such purpose.

(2) Whenever it is necessary to do so for the purpose of inspecting, maintaining or repairing a public telecommunication licensee's installation or plant or for the purpose of carrying out any functions conferred on a public telecommunication licensee under this Act or under any licence granted under section 5, that licensee or any person authorised by that licensee in that behalf may, at any reasonable time, enter upon any land or building, whether or not such installation or plant has been laid, placed, carried or erected on, under, upon or over the land or building, and may carry out all necessary inspection, maintenance or repair, and may in the course thereof, fell or lop trees, remove vegetation and do all other things necessary for the purpose, causing as little damage as possible and paying

Removal or alteration of installation or plant for telecommunications

17. —(1) Where a public telecommunication licensee's installation or plant has been laid, placed, carried or erected on, under, upon or over any land under section 13 or 14, and any owner or occupier of the land or any person to or by whom the land is subsequently alienated or occupied desires to use the land in such manner as to render it necessary or convenient that such installation or plant should be removed to another part of the land, or to a higher or lower level, or altered in form, he may require that licensee to remove or alter such installation or plant accordingly.

(2) If the licensee fails to comply with the requisition, the person may apply in writing to the Authority and the Authority shall, as soon as practicable, specify a date to inquire into the facts of the case.

(3) Subject to subsection (8), upon the conclusion of the enquiry, the Authority may require, subject to such terms, conditions and stipulations as it thinks fit, the removal or alteration of such installation or plant.

(5) Where an owner of any land desires to use his land for the purposes of development and he considers it necessary that a public telecommunication licensee's installation or plant that has been laid, placed, carried or erected on his land should be removed therefrom, he may request the licensee to remove the same from his land.

(6) Where a public telecommunication licensee undertakes the work of removal pursuant to the request of the owner under subsection (5), the owner shall pay compensation to the licensee.

(7) Subject to subsection (8), if a public telecommunication licensee does not intend to undertake the work of removal pursuant to the request of the owner under subsection (5), that licensee shall, by notice in writing, inform the owner and the Authority of its intention and the Authority shall specify a date not less than 14 days from the date of the notice to inquire into the facts of the case.

Removal of trees dangerous to or obstructing any installation or plant for telecommunications

18. —(1) Where, in the opinion of a public telecommunication licensee, there is at any time danger or suspected danger that any tree (which term in this section includes undergrowth) near the licensee's installation or plant may interrupt or interfere with any telecommunication service or cause damage to such installation or plant, the licensee may cause the tree to be felled or dealt with in such other manner as will, in its opinion, avert the danger.

(2) A public telecommunication licensee shall, in the exercise of its powers under subsection (1), be subject to the provisions of the Parks and Trees Act (Cap. 216).

(3) Where a tree, which has been felled or otherwise dealt with under subsection (1), was in existence before the public telecommunication licensee's installation or plant was placed, erected or installed, the licensee may subject to subsections (4) and (5) pay to any person adversely affected such sum as may be agreed by way of compensation.

(4) No further compensation shall be paid for the felling or lopping of any tree or the clearing of any vegetation where the action is necessary for the maintenance of a public telecommunication licensee's installation or plant and the tree and vegetation have grown or been allowed to grow since the payment of compensation under subsection (3).

(5) No compensation shall be payable by a public telecommunication licensee under subsection (3) in respect of any tree within 20 metres of the centre line of any road constructed or maintained by the Government or by any public authority unless it is proved that the tree was in existence prior to the construction of the road.

(6) In the event of the owner or occupier of any land felling, lopping or clearing any tree or vegetation adjacent to a public telecommunication licensee's installation or plant, the owner or occupier shall give the licensee 14 days' notice in writing of his intention to do so and shall take all such reasonable precautions as the licensee may require for the protection of such installation or plant.

(7) If any such owner or occupier fails to give notice as provided under subsection (6) or having given notice fails to take any such reasonable precautions as the public telecommunication licensee may have required, he shall be liable to pay the licensee any cost and expense incurred by the licensee for any damage caused to any such installation or plant, and a certificate purporting to be under the hand of the Chief Executive of the licensee stating the amount of the cost and expense incurred by the licensee shall be prima facie evidence of the amount due from the owner or occupier.

(8) If the amount due for the cost and expense is not paid within 7 days after demand, the amount may be recovered in the same manner as if it were a simple contract debt.

(9) If any tree is felled or vegetation is cleared upon land adjacent to a public telecommunication licensee's installation or plant, it shall be presumed until the contrary is proved that the tree was felled or the vegetation was cleared by the owner or occupier of the land or by his employees or agents acting as such.

Provision of space or facility by developer or owner of building

19. Any developer or owner of a building who requires any telecommunication service of a telecommunication licensee shall provide at his expense, and in accordance with such specifications as the Authority may publish, such space and facilities within or on the building and access thereto, as may be necessary for the operation of any installation or plant to be used in providing the telecommunication service.

Provision of facilities for radio-communication

20. —(1) Any person who intends to install, erect or construct, within a radius of 200 metres from the site of a telecommunication licensee's installation or plant used in connection with its radio-communication service, any building more than 30 metres above ground level shall notify the licensee in writing before carrying out any such installation, erection or construction.

(2) The telecommunication licensee may, after receiving such notification from the person, make arrangements with the person for the licensee to enter upon the building at any reasonable time to provide such accommodation or other facilities in or around the building as may be necessary or proper for any installation or plant used in connection with radio-communication service to be laid, placed, constructed, erected or installed in, on or around the building.

(3) Where, in the opinion of a telecommunication licensee, a building which is installed, erected or constructed after the licensee's installation or plant used in connection with its radio-communication service was laid, placed, constructed, erected or installed in or around the building, interrupts or interferes with the licensee's radio-communication service or system, the licensee may, with the approval of the Authority, at any reasonable time, enter upon the building to provide such accommodation or other facilities in or around the building as may be necessary or proper for such installation or plant to be laid, placed, constructed, erected or installed in, on or around the building for the purposes of eliminating such interruption or interference.

(4) The telecommunication licensee shall pay compensation to the owner or occupier of any building for any disturbance, disability or damage caused as a result of any act of the licensee under subsection (2) or (3).

(5) For the purposes of this section and section 19, "a building" means any permanent or temporary building and includes any structure or erection of any kind

(whether permanent or temporary) and any extension, modification or alteration made thereto.

Provision of installation, plant or system or space or facilities by direction of Authority

21. —(1) Where the Authority considers it necessary that any telecommunication service should be provided to any building, whether completed or not, or that the quality of a telecommunication service provided to any building be enhanced, the Authority may by direction —

- (a)* require, in connection with paragraph *(b)*, the developer or owner of the building or land to provide at his expense, within such period as may be specified in the direction, such space and facilities within or on the building or land, and access thereto, as the Authority may specify in the direction; and
- (b)* require any telecommunication licensee to install, within such period as may be specified in the direction, such installation, plant or system as the Authority considers necessary for the provision, or the enhancement of quality, of the telecommunication service.

(2) Any direction under subsection (1) may include —

- (a)* a requirement that the telecommunication licensee shall contribute, wholly or partly, to such costs and expenses incurred for the provision of any installation, plant or system, or space or facilities under subsection (1) as the Authority may determine; and
- (b)* such other requirements as the Authority may specify.

(3) Any person who fails to comply with any requirement in a direction under subsection (1) shall be guilty of an offence.

Sharing of installation, plant or system

22. —(1) The Authority may direct any telecommunication licensee to co-ordinate and co-operate, in such manner and on such terms as the Authority may specify, with any other person, in the use or sharing of any installation, plant or system, or part thereof, used for telecommunications.
