

**TABLE OF RADIO FREQUENCY
ALLOCATIONS
OF
THE REPUBLIC OF CHINA**

Directorate General of Telecommunications

Ministry of Transportation and Communications

December 19 , 2005 revised

◆ Regulation :

The table of radio frequency allocation is promulgated under Administrative Regulations on Radio Waves Article 5 :

“The allocation of frequencies between 9 kHz and 300 GHz to all services shall be in accordance with the Republic of China Radio Frequency Allocation Table promulgated by the Ministry of Transportation and Communications.

For the purposes of the overall development of telecommunication and information, the frequencies shall be harmoniously and effectively shared, the aforementioned Table of Frequency Allocation shall be periodically reviewed, revised and promulgated by the Ministry of Transportation and Communications. “

◆ Classification of services :

The allocation of frequencies shall be classified in accordance with the following services:

- 1.Fixed Service. Such term shall refer to a radiocommunication service between specified fixed points.
- 2.Fixed-Satellite Service. Such term shall refer to a radiocommunication service between earth stations at given positions, when one or more satellites are used in some cases. This service includes satellite-to-satellite links, which may also be operated in the inter-satellite service. The fixed-satellite service may also include feeder links for other space radiocommunication services.
- 3.Aeronautical Fixed Service. Such term shall refer to a radiocommunication service between specified fixed points. It is provided primarily for the safety of air navigation and for the regular, efficient and economical operation of air transportation.
- 4.Inter-Satellite Service. Such term shall refer to a radiocommunication service for links between artificial satellites.

- 5.Space Operation Service. Such term shall refer to a radiocommunication service concerned exclusively with the operation of spacecraft, in particular space tracking, space telemetry, and space telecommand. These functions will normally be provided within the service in which the space station is operating.
- 6.Mobile Service. Such term shall refer to a radiocommunication service between mobile and land stations, or between mobile stations.
- 7.Mobile-Satellite Service. Such term shall refer to the following services:
- (1) A radiocommunication service between mobile earth stations and one or more space stations, or between space stations used by this service.
 - (2) A radiocommunication service executed between mobile earth stations by means of one or more space stations. This service may also include feeder links necessary for its operation.
- 8.Land Mobile Service. Such term shall refer to a mobile service between base stations and land mobile stations, or between land mobile stations.
- 9.Land Mobile-Satellite Service. Such term shall refer to a mobile-satellite service in which mobile earth stations are located on land.
10. Maritime Mobile Service. Such term shall refer to a mobile service between coast stations and ship stations, or between ship stations, or between associated on-board communication stations. Survival craft stations and emergency position-indicating radio beacon stations may also participate in this service.
- 11.Maritime Mobile-Satellite Service. Such term shall refer to a mobile-satellite service in which mobile earth stations are located on board ships. Survival craft stations and emergency position-indicating radio beacon stations may also participate in this service.
- 12.Port Operations Service. Such term shall refer to a maritime mobile service in or near a port, between coast stations and ship stations, or between ship stations, in which messages are restricted to those relating to the operational handling, the movement and the safety of ships, the communication for safety in case of emergency. Some communications

which are correspondence nature shall be excluded from this service.

13. Ship Movement Service. Such term shall refer to a maritime mobile safety service between coast stations and ship stations, or between ship stations other than the port operations service. Its messages are restricted to those relating to the movement of ships.
14. Aeronautical Mobile Service. Such term shall refer to a mobile service between aeronautical stations and aircraft stations, or between aircraft stations, in which survival craft stations may participate; emergency position-indicating radio beacon stations may also participate in this service on designated distress and emergency frequencies.
15. Aeronautical Mobile-Satellite Service. Such term shall refer to a mobile-satellite service in which mobile earth stations are located on board aircraft. Survival craft stations and emergency position-indicating radio beacon stations may also participate in this service.
16. Broadcasting Service. Such term shall refer to a radiocommunication service in which the transmission is intended for direct reception by the general public. This service may include sound transmissions, television transmissions or other types of transmission.
17. Broadcasting-Satellite Service. Such term shall refer to a radiocommunication service in which signals transmitted or retransmitted by space stations are intended for direct reception by the general public. In the broadcasting-satellite service, the term "direct reception" shall encompass both individual reception and community reception.
18. Radiodetermination Service. Such term shall refer to a radiocommunication service for the purpose of radiodetermination.
19. Radiodetermination-Satellite Service. Such term shall refer to a radiocommunication service for the purpose of radiodetermination involving the use of one or more space stations.
20. Radionavigation Service. Such term shall refer to a radiodetermination service for the purpose of radionavigation.
21. Radionavigation Satellite Service. Such term shall refer to a radiodetermination satellite service for the purpose of

radionavigation.

22.Maritime Radionavigation Service. Such term shall refer to a radionavigation service intended for the benefit and the safe operation of ships.

23.Maritime Radionavigation Satellite Service. Such term shall refer to a radionavigation satellite service in which earth stations are located on board ships.

24.Aeronautical Radionavigation Service. Such term shall refer to a radionavigation service intended for the benefit and the safe operation of aircraft.

25.Aeronautical Radionavigation Satellite Service. Such term shall refer to a radio-navigation satellite service in which earth stations are located in the aircraft.

26.Radiolocation Service. Such term shall refer to a radiodetermination service for the purpose of radiolocation.

27.Meteorological Aids Service. Such term shall refer to a radiocommunication service used for meteorological (including hydrological) observation and exploration.

28.Earth Exploration-Satellite Service. Such term shall refer to a radiocommunication service between earth stations and one or more space stations, it may include links between space stations. This service shall include the following:

(1)Data relating to the characteristics of the Earth and its natural phenomena which is obtained from active sensors or passive sensors on Earth satellites;

(2)Similar data is collected from air or earth-based stations;

(3)Such data can be distributed to earth stations within the system concerned;

(4)Base station interrogation may be included.

29.Meteorological-Satellite Service. Such term shall refer to an earth exploration-satellite service for meteorological purposes.

30.Standard Frequency and Time Signal Service. Such term shall refer to a radiocommunication service for scientific, technical and other purposes, it provides the transmission of high precision frequencies, time signals, or both, intended for general reception.

31.Standard Frequency and Time Signal-Satellite Service. Such term

shall refer to a radiocommunication service using space stations on earth satellites for the same purposes as those of the standard frequency and time signal service. This service may also include feeder links necessary for its operation.

- 32.Space Research Service. Such term shall refer to a radiocommunication service in which spacecraft or other objects in space are used for scientific or technological research purposes.
- 33.Amateur Service. Such term shall refer to a radiocommunication service for the purpose of self-training, intercommunication and technical investigations carried out by amateurs, that is, by duly authorized persons interested in radio technique solely with personal aim and without pecuniary interest.
- 34.Amateur-Satellite Service. Such term shall refer to a radiocommunication service using space stations on earth satellites for the same purposes as those of the amateur service.
- 35.Radio Astronomy Service. Such term shall refer to a radiocommunication service involving the use of radio astronomy.
- 36.Safety Service. Such term shall refer to a radiocommunication service used for the safeguarding of human life and property permanently or temporarily.
- 37.Special Service. Such term shall refer to a radiocommunication service, not otherwise defined in Sections 1 through Section 36, carried on exclusively for specific needs of general utility, and not open to public correspondence.

◆ Term Explanation :

- | | |
|---|---|
| (1) EPIRB | Emergency Position-indicating radiobeacon. |
| (2) GPS | Global Positioning Systems. |
| (3) IMT-2000 | International Mobile Telecommunications-2000. |
| (4) the Low Power Radio Waves Radiated Devices (the | |

“Low Power RF Devices”).

The Low Power RF Device means the controlled telecommunications radio-frequency devices in compliance with “Low-power Radio-frequency Devices Technical Specifications”.

(5) Deep Space

It means the outer space far from the earth for 2 million miles or above.

(6) ITU International Telecommunication Union.

◆ Radio Frequencies and Band

Hz = Hertz

kHz = 10^3 Hz (kilo,k)

MHz = 10^6 Hz (Mega,M)

GHz = 10^9 Hz (Giga,G)

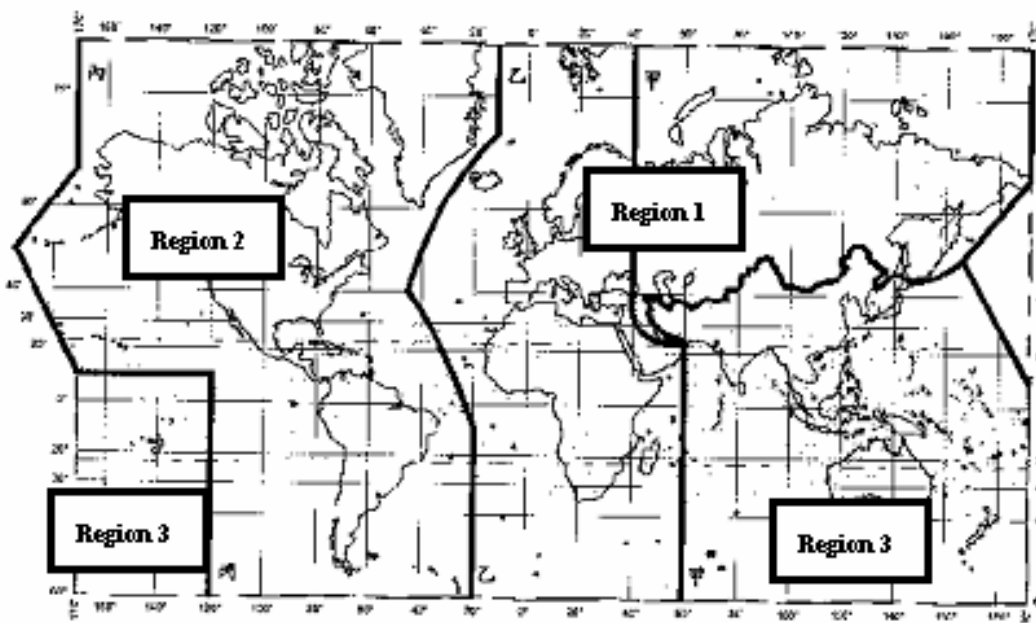

THz = 10^{12} Hz (Tera,T)

ITU's Radio Frequency Division

Band Number (N)	Band Name	Frequency Scope	Wave Length
4	VLF	3-30kHz	10,000m
5	LF	30-300 kHz	1000 m
6	MF	300-3000 kHz	100 m
7	HF	3-30MHz	10 m
8	VHF	30-300 MHz	1 m
9	UHF	300-3000 MHz	1/10 m
10	SHF	3-30GHz	1/100 m
11	EHF	30-300 GHz	1/1000 m
12	-	300-3000 GHz	1/10,000 m

Remark : Band Number (N) means band is between $0.3 * 10^n$ and $3 * 10^n$.

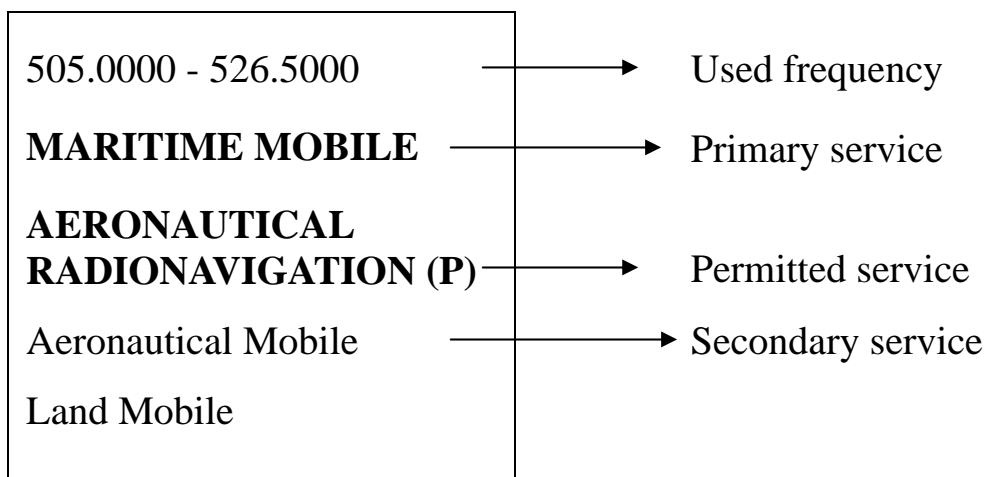

- ◆ ITU divided world into 3 regions for the convenience of frequency allotment.

- ◆ Explanation of ROC's Radio Frequency Allocation Table

- Column 1 : region 3 frequency allocations of ITU's radio regulations.
- Column 2 : ROC's Radio Frequency allocations.
- Column 3 : Corresponding to Column 2 of the allocation of frequencies, the sole frequency of special services are remarked on it.

- ◆ Illustration :
